

1 SKILLS

- **Programming** - TypeScript, Golang, React, Next, Docker, JavaScript, Hono, Node, Git, LangChain, HubSpot, PostgreSQL, Supabase, AWS
- **Language Skills** - Portuguese(C2), English (C2), Swedish (B2), German (B1)

2 WORK EXPERIENCE

Thorit GmbH

Full Stack Engineer (Full time)

2025.07 – Present

- **Backend Platform:** Developed an RESTful API following clean code and architecture principles, enabling a multi-brand client to manage all their leads and processes within a single application. (Tech: TypeScript, Supabase, PostgreSQL, AWS)
- **API Optimization:** Refactored an API to improve code maintainability and decoupling between the different application layers, enabling easier future additions, replacements, and removals of features, databases, and third-party services. (Tech: TypeScript, Supabase, PostgreSQL, AWS)
- **Data Migration & Integrations:** Designed and implemented middleware services to migrate client data and business workflows, handling schema mapping, validation, and error recovery. Built scheduled synchronization pipelines for automated daily data transfers. (Tech: TypeScript, HubSpot)

High 5

Full Stack Engineer (Part Time)

2025.09 – Present

- **AI Messaging System:** Developed an AI-driven messaging system that processes conversational context to automate backend business workflows and user interactions. (Tech: TypeScript, Supabase, Twilio)

Link37

Full Stack Engineer

2024.02 – 2025.07

- **BigQuery Integration:** Built an integration between a BigQuery DB and a CRM with millions of clients and thousands of daily entries, automating the import of previous and ongoing data. (Tech: Golang, SQL)
- **RAG Chatbot:** Built a multi-client AI chatbot using a Retrieval-Augmented Generation (RAG) system to enhance the buyer experience for an e-commerce platform. (Tech: Next.js, Docker, LangChain)
- **VPS Migration and Infrastructure:** Led the migration of all company projects from physical servers to a containerized VPS environment, improving scalability and reliability. (Tech: Docker, Linux, Traefik)
- **Middleware Development:** Developed middleware to automate API integrations, enabling seamless content creation, updates, and synchronization across client websites and applications. (Tech: Golang)

Freelancer

2023.08 – 2024.02

- **Web Development:** Designed and developed multiple responsive webpages. (Tech: React, Next.js)
- **Integrations:** Connected frontends with CMS platforms and external APIs. (Tech: TypeScript)

3 PROJECTS

Personal Portfolio

- Personal portfolio that showcases some of the projects built during personal time. (Link: [Portfolio Website](#))

4 EDUCATION

Bachelor's Degree in Electronics Engineering

Instituto Superior Técnico

2017.09-2020.07

- Relevant Courses: Computer Networks, Algorithms and Data Structures, Computational Systems

Master's Degree in Computer Science and Engineering

Instituto Superior Técnico

2020.09-2023.06

- Dissertation: Benefits and Challenges in DevOps Adoption
- Relevant Courses: Machine Learning, Deep Learning, Natural Language, Learning and Intelligent Decision Making
